

ABOUT

Front-end **web developer** with **2.5+ years'** experience skilled in ideation, design, and development of user-friendly, responsive web applications. Focused on creating seamless, intuitive experiences for users.

WORK EXPERIENCE

Front End Developer, HepthWap

June 2022- Present, Bangalore

- Challenged myself, went out of my comfort zone and risked years to skill-up and contributed to projects, **started by me** with the intention of helping at least few people via web apps to bring their ideas to reality.
- **Worked on 3+ personal projects:** Shri Sai Accessories, Healthy-Rise, and HepthWap, each with a unique purpose.
- **Worked with 2 clients**, one from India and one from the US, **contributing to bringing their ideas to reality with my frontend skills**. The project required knowledge of the backend, so I explored and worked on full stack development as well. **From collecting clients' requirements, designing UI and UX, to executing the idea, I worked as a sole developer until the end product.**

CLIENT PROJECTS

Client – Joy of Music

- Worked **on 3 projects**, including two frontend and one backend. Developed a music jigsaw puzzle with drag-and-drop functionality and created an admin dashboard with login functionality and CRUD operations.
- Implemented a common backend that serves data to both UIs,
- This **web app is now used by 20+ people and an admin** and now working on scaling of the web app.
- **Tech Stack Used:** ReactJS, NodeJS, ExpressJS, MongoDB, Firebase Authentication, Media Queries for Responsiveness

Client – StAIs

- Currently working for the company website using ReactJS

Front End Developer-L1 (Remote), Authority Entrepreneurs

Jan 2022- May 2022, Hyderabad

- Developed multiple landing pages for client websites utilizing **HTML, CSS, and JavaScript**, ensuring effective and visually appealing web interfaces.
- Contributed to the creation and enhancement of chatbot user interfaces and email signatures to deliver interactive and professional communication elements.

Software Development Engineer-1, Zignite Labs

Aug 2021- Nov 2021, Bangalore

- Developed an interactive dashboard for a US-based client, facilitating the comparison of diverse stocks using **ChartJS, Material-UI, and Ant Design**, and **React-JS** enhancing their decision-making process.
- Engineered and implemented **engaging chat widgets** featuring a teaser window and **iframe** functionalities using **JavaScript, Media Queries, and Bootstrap**, enhancing user interaction and experience.

PERSONAL PROJECTS

HealthyRise

- Combined meditation, yoga, gym, warm-up, and healthy meal resources into a unified **web application**.
- Designed a responsive web app with collected data. **Utilized HTML, CSS, JavaScript, React-JS, and React-Router** for varied functionalities.

Shri Sai Web Accessories

- Developed an **e-commerce platform** using React for an interactive shopping experience.
- Employed **JSX, SASS, React.JS, and Context API** for enhanced **UI/UX** and **state management**.
- Ensured **responsiveness** across various devices using **Media Queries** for a seamless experience.
- Incorporated **Firebase for secure authentication and data storage**, ensuring user data security.

EDUCATION

- **B.E** in Electronics and Communication, CGPA: **9/10** **2017-2021**, Malnad College of Engineering, Hassan
- **PUC** in Sri Sai Angels Pre-University College, Percentage: **95.12** **2015-2017**, Chikkamagalur
- **SSLC** in Nalanda English Primary and High School, Percentage: **97.12** **2014-2015**, Mudigere.
